A passionate professional individual seeking a new challenge as a full-stack developer; after recently graduating from the developer course at Northcoders.

Technical Skills

AWS RDS, JavaScript, NodeJS, Express, Knex, HTTP, SQL, PostgreSQL, React, Axios, CSS, HTML5 , Fusion-charts

Experience

2021-01 - 2021-05 **Northcoders' Student - Northcoders, Manchester**

Northcoders is a leading coding school that offers a full-stack 14 weeks intensive course that is an industry-led programme. Being a Northcoders student is like working full-time, throughout course; I studied the fundamentals of JavaScript including functional and object-oriented programming. In Back-End, I studied Node.js, asynchronous programming and learning about APIs and databases such as HTTP, Express, SQL, and Postgres. In Front-End, I learnt about the DOM making accessible websites with semantic HTML and responsive CSS. And mainly using React framework and learning about key peripheral technologies. the skills I developed:

- Applying agile pair programming on projects.
- Using test driven development *TDD* approach.
- Establishing projects workflow on *GitHub* using version control with *Git*.
- Writing Psuedo code on how each problem will be approached.
- Writing clean code and human readable.
- Working individually on different code katas with *TDD* every day.

Projects

Building my first personal portfolio website, achieved using a complete HTML, CSS and JavaScript. It is a good practice for my CSS skills.

- **Link to repository:** GitHub repository

Building a frond-end Hangman game. My first simple game achievement built using *React* framework and sole purpose of building this game is more of a practice and an understanding of how react works. The involved technologies such as React.js, CSS and different JavaScript functionalities applied in the game.

- **Link to repository:** [GitHub repository](#)

My first full-stack News webapp achieved using React framework and fully built API server which serves a social news aggregation, web content rating, and discussion website. The webapp has articles which are divided into topics. Each article has user curated ratings and can be up or down voted using the API. Users can also add comments about an article. Comments can also be up or down voted. A user can add comments and remove any comments which they have added.

2018-09
2019-01
- **Store Supervisor - Kurt Geiger, Manchester**

2015-11
2018-09
- **Sales Lead - Aldo Group, Manchester**

Education

2021-01
2021-05
- **Web Development Bootcamp**
Northcoders - Manchester

2017-09
2018-12
- **Master of Science: Petroleum and Gas Engineering**
University of Salford - Manchester

2014-09
2017-06
- **Bachelor of Science: Mechanical and Petroleum Engineering**
University of Salford - Manchester

Volunteering

I am member in Cheadle Cycling Club (CCC), I volunteered in summer 2018 to cycle for 60 miles from Heald Green to Blackpool Tower to raise money for a good cause for a new-built mosque, so the community can have better facilities and to have more rooms for the CMA primary school and to accommodate larger activities. Also, I am contributing again this August for the same cause in cycling ride from London to Paris (180miles).

Interests

- Cycling - when I am not coding, I go out cycling to challenge the uphills.
- Hiking - I love discovering new scenery
